She looked uncertainly at Bernard for a few seconds, and then said, "It's not really anything to do with that. It's- oh, I can't put this any other way-it's you.". Jay decided' he'd had enough, excused himself with a mumble, and took his book into the lounge. His father was sprawled in an armchair, talking politics with Jerry Pernak, a physicist friend who had dropped by an hour or so earlier. Politics was another mystery that Jay assumed would mean something one day..After another short silence Lechat said, "It's a strange system of currency though, isn't it. I mean, it's not additive at all, or subject to any laws of arithmetic. You can pay what you owe and still not be any poorer yourself. It sounds --I don't know impossible somehow.". The muscles of Stern's face tensed; he quivered visibly with the effort of suppressing his rage. "I was willing to bargain," he grated. "Evidently we have failed to impress upon

you the seriousness of our intentions. Very well, you leave me no further choice. Perhaps a demonstration will serve to convince you." He turned to Stormbel. "General, advise the status of the missile now targeted at the Chiron scientific base in northern Selene." "ordinary boy under the name Curtis Hammond or any other." "I'm a painter," the painter said over his shoulder. "I like to see a paint job properly done. Why else would anyone do it?" He stepped back, surveyed his work with a critical eye, nodded to himself, and dropped the brush into a flap in his walking workshop, where a claw began spinning it in a solvent. "Anyhow, the people who live here fix plumbing, manage a bar in town, and one of them teaches the tuba. My plumbing sometimes needs fixing, I like a drink in town once in a while, and one day one of my kids might want to play the tuba. They fix faucets, I paint houses. What's so strange?" "I don't think it could work," Pernak said, shaking his head after Lechat had finished. "None of the things everybody else is yelling about up here can work either. They haven't gotten it into their heads yet that nothing they've had any experience with applies to Chiron. This is a whole new phenomenon with its own new rules." "person again. Never. The real Leilani was back? rested, refreshed, ready to take care of business..inside. They grin at him, complete with pink gums, but purged of blood." "What does a Chironian computer print when you attempt illegal access?" one of them asked Colman when they had got into their joke repertoires.. "You're looking more like a mutant all the time.." "might dam the stream forever, leaving her parched and mute and defenseless, Leilani filled the narrow. His confidence is restored..the police.." "They won't stop anything, Paul," Pernak said. "They're up against the driving force of evolution. Canute had the same problem." Shirley turned to look at Ci. "Say, wouldn't he be great to have at our next party? I love things like that." She looked at Driscoll again. "When are you coming down to Chiron?" Bernard spread his hands resignedly. "Very well, I can seethe sense in being prepared. But I can't see how it affects our planning here in Engineering, up in the ship." "Oh, there was something I meant to show you," Sirocco said, shifting his feet from the desk and turning toward the companel. "It come in earlier this evening. Want a laugh?" "grass, she edged backward." "It's a wonderment, isn't it?" the girl said. "More than a wonderment. It's impossible." "They wound it up early. Anyhow, Bud told me it'll be open again tomorrow. Check it out and give it a try." herself, and honest enough to admit to the shame, though dishonest enough to try to avoid facing up to. Module's armaments; alternatively, with the added strength of the regulars who had arrived below. He could hold the lock open against the SD's coming from the Battle Module until the rest of the Army arrived. It was time for him to decide his answer.. "Hell is spending eternity as the hero in a Bobby Zoon flick." Everybody looked inquiringly at everybody else, but there was apparently nothing more to be added for the moment. At last Colman rose to his feet. "Then I guess the sooner we get moving, the more chance we'll have of figuring out all the angles." The others in the room got up by ones and twos from where they had been sitting. Colman, Lechat, Bernard, and Celia gathered by the door in preparation to leave, while the others moved across to see them on their way, with Veronica clinging to Celia's arm.. Perhaps the only good thing about the unextinguishable anger that had charred Micky's life was that it. So how did people like Howard Kalens feel about Chiron? Colman wondered. Did they think they could possess a whole planet? Was that why they erased kids minds and turned them into Stromboli puppets who'd think what they were told to, and into civilians who would say it was okay? But why did the people let them do it? Most people didn't want to own a planet; they just wanted to be left alone to be engineers or run their farms. Because they played along with the rules that said they were. CHAPTER TWENTY-FIVE. Sirocco climbed back onto the platform to stand in front of the sketches that he had been using earlier, and gazed around for a few seconds while he waited for everybody's attention. "Well, you'll all be pleased to hear that our resident larceny, counterfeiting, and code-breaking expert has proved himself once again," he announced. "Phases one and four appear to be feasible, as we discussed." To one side and below the platform, Stanislaw turned with a broad, toothy grin and clasped his hands above his head to acknowledge the chorus of murmured applause and low whistles, rendered enthusiastically, but quietly enough not to attract undue attention to the block at that time of the. "You too," Colman said. He and Driscoll left for the forward section of the Spindle to join Swyley, who, if all was going well, would already be organizing the men drifting in from various parts of the ship to block off the. "Cromwell knows everything," Amy declared from her perch. "Cromwell, are those soldiers carrying Terran M32 assault cannon, or are they M30s?" and the law-enforcement officers in those two SUVs is not happening. He wishes they would just. face. One of the reasons America declined was that it allowed science to become too popular and too familiar.. The preacher seemed taken aback for a split second, but recovered quickly. "The world around us," he bellowed, throwing his arms wide. "Is it not there? Do I not see it? Who created it? Tell us. Is that not evidence enough?" when, as she lay sleepless in another time and place, they had rolled past in the night with a rhythmic. In this deep quiet, Micky gradually became aware of the whispery sputter-sizzle of burning candle. "I guess I'll have to think about it," Jay conceded. Hanlon ordered three hamburger dinners, and the two sergeants spent a half hour talking with Jay about Army life, football, and how Stanislaw could crash the protected sector of the public databank. Finally Jay said he had to be getting home, and they walked with him up several levels to the Manhattan Central capsule point.. Lechat shook his head. "It wasn't necessary. In a few more days Ramisson would have been elected, almost certainly. Then everything would have worked itself out smoothly and tidily. This action complicates everything again. Wellesley is probably declaring an emergency right now, in which case the election will automatically be suspended. It puts everything back weeks, maybe months." "How do you mean, Jerry?" Lechat asked across the table. He was a slightly built man of average height, in his late forties, with thinning hair and a dry, pinkish complexion. He tended to red at the nose and the cheeks in a way that many would have considered indicative of a fiery temperament, but this was totally belied by his placid disposition and soft-spoken manner.. The kitchen had seemed quiet before, but the fridge had been making more noise than Micky realized.. He moves faster and more boldly, striking out directly toward the "full range of services," which are. energy, as knights might thunder toward a joust, lances of light piercing the high-desert darkness. In these. The sky outside was sunny and blue with a few scattered clouds, and a pleasantly warm breeze carried the scents of rural freshness from the hills rising to the south. Fallows still wasn't fully accustomed to the notion that it was all real and not just a simulation projected from the roof of the Grand Canyon module, or that the low roars intermittently coming in through the opened window of the living room downstairs were from shuttles ferrying up and down to what was now another realm. He allowed his mind to distract itself with the final chores of moving while it completed its process of readjustment.. "I'm not suicidal. I'm just a wiseass." Colman and Hanlon frowned at each other. Obviously they weren't going to get anywhere without being more direct. Hanlon wiped his palms on his hips. "We, ah... we don't mean to be nosy or anything, but out of curiosity, were damp, sure, and your hands were cold, all right, and your mouth was dry, but nevertheless you had. In the end Kalens rallied everybody to a consensus with a proposal to formally declare a Terran enclave within Canaverall City, delimited by a clear boundary inside which Terran law would be proclaimed and enforced. The Iberia

proposal would require months, he told Lechat, whereas the immediate issue to be resolved was that of Terran security. In any case, it could hardly be carried out without an electoral mandate. The enclave would preserve intact a functioning and internally consistent community which could be transplanted at some later date if the electoral results so directed, and therefore represented as much of a step in the direction that Lechat was advocating as could be realistically expected for the time being. Lechat was forced to agree up to a point and felt himself obliged to go along...but which seemed only impossibly difficult now...Bernard threw up his hands in exasperation. "Well, hell, let's say because they're just plain crazy. They don't need any reason. Never mind why, but let's say it's happened. What do you do?..."motioning Padawski and his group to their feet, the major marched over to where Colman and the others from D Company were standing with the Chironians who had been upstairs with them. He had already taken their names and established that they had not witnessed the incident firsthand. "You guys are free to go," he informed them. "If there's a hearing, you might be called in to testify. If so, the appropriate people will contact you..."could endure, this was too much, too much, intolerable..."Well, there's something to think about," Cromwell suggested...The propulsion systems master control computer monitored the final stages of phase-down of the burn and shutdown the main-drive reactors. As the huge reaction dish that had contained the force of two tons of matter being annihilated into energy every second for six months began to cool, the ship was nudged gently into high orbit at 25,000 miles by its vernier steering motors and configured itself fully for freefall conditions to become a new star moving across 'the night skies of Chiron...'He shot my Vernon twice, and apparently then he shot me...'Chapter 15.'He's saying money's nothing but vomit to him...'wearing either black vests or black windbreakers with the letters FBI blazing in white across their chests...held fast to the idea that this service to Laura might eventually redeem him. The hope of atonement was...'Get away from being caged in at home, be your real.open land. The rotors aren't turning, but evidently the engines are running, since the interior is softly...'Oh...' Jay set the painting down by the wall and frowned at it as if he had just noticed it for the first time. "I thought that might look nice in my room." He unslung the backpack and fished inside the flap, which he hadn't bothered to fasten. "I bumped into a couple of guys from school, and we thought maybe we'd get out and see some of the country with some Chironians we met. There's a lot more of it around here than inside the GC module. So I got these." He produced a pair of thick-soled boots, a hooded parka made from a thick, bright red, windproof material with a storm flap that closed over the front zipper, a pair of gloves with detachable insulating inners, some heavy socks, and a hat that could unfold to cover the ears. "We were thinking of going to the mountains across the sea," he explained. "You can get there in a flyer from Franklin in about twenty minutes..."bursting with potential in this rank, mildew-riddled bathroom. Leilani knew that many intelligent...able to spend on a daughter or a son hadn't diminished in value over time, but had grown into a wealth of.circumference of each iris...the roof, stabbing out from the jeweled hilt of red and blue emergency beacons...hideous tunneling something, all teeth and appetite, will explode out of the forest floor under his feet...linger after its visitation...from a delicious dream...The next part was going to be the trickiest. The information obtained by Stanislaw had confirmed that the outside entrances to the complex, which had already been bypassed, were the most strongly guarded, and the three inner access points to the Communications Center itself- the main foyer at the front, the rear lobby, and a side entrance used by the staff-were covered by less formidable, three-man security teams. The problem with these security teams lay not so much with the physical resistance they might offer, but with their ability to close the Communications Center's electrically operated, armored doors and raise the alarm at the first sign of anything suspicious, which would leave Sirocco's force shut with no hope of achieving their objective and facing the bleak prospect of either fighting it out or surrendering to the guard reinforcements that would show up within minutes. On the other hand, if Sirocco could get his people inside, the situation would be reversed...proportions. The open doors revealed a large TV screen...shoulders length auburn hair was tied back in a ponytail, and she was wearing tan slacks with an orange silk blouse covering firm, full breasts.

She looked up as Howard came out of the home. Her expression did not change. Their relationship was, and for all practical purposes always had been, a social symbiosis based on an adult recognition of the realities of life and its expectations, uncomplicated by any excess of the romantic illusions that the lower echelons clung to in the way that was encouraged for stability, security, and the necessity for controlled procreation. Unfortunately, the masses were needed to support and defend the structure. Machines had more-desirable qualities in that they applied themselves diligently to their tasks without making demands, but misguided idealists had an unfortunate habit of exploiting technology to eliminate the labor that kept people busy and out of mischief. Too, the idealists would teach them how to think. That had been the delusion of the twentieth century; 2021 had been the consequence...killer-cyborg quality. Made of steel, hard black rubber, and foam padding, it provided to her some of the..."I never said they'd do anything," the robot replied. "I just said that people telling them wouldn't bother them..."He's not convinced that his mother would be proud of him if he bit his way to freedom.
